Moshiur Rahman

Mr. Moshiur Rahman is a successful and remarkable personality. He has been relentlessly helping out innumerable people in their livelihoods thereby, unceasingly contributing to the welfare of the people and the country. He was born in January, 1961 at the then Nawab Bari Hosne Dalan, Islampur that is now known as Ahsan Manzil in old Dhaka. However, his domicile residence is in Doulatpur, Cumilla, Bangladesh.

He is the fifth among the four sons and three daughters of late Mizanur Rahman and Sufia Rahman. His father, having worked at the British Air Force, before partition, subsequently, endeavoured in the business of printing press. Moshiur Rahman is happily married to Yasmin Rahman and blessed with two sons and a daughter. The eldest son Mehran Rahman works alongside the father in business while the younger son Mahir Rahman completed his degree in Computer Science at the University of British Columbia, Canada. The only daughter Maliha Rahman lives in Canada with her husband as well. Through her father's inspiration, the daughter has mastered the arts of baking and design and established her very own bakery named Pastel Bakes, located in Toronto, Ontario.

Moshiur Rahman got initiated to photography, while at school. In the initial days, he would borrow camera from friends to take pictures and diligently try to learn the multi-faceted aspects of the camera. While in class eight, he bought a camera for himself. Among the family members, his father used to encourage him the most in photography. At that time, negatives were used, which then, needed to be printed into a photograph. Thus, he would embark on travels with a stock of film rolls at his disposal. However, due to strenuous involvement with business, he had to take a temporary respite from photography during 1995 – 2009. But, can someone who loves and lives with photography, remain aloof from it for long? Thus, he renewed his passion for photography in 2010. In 2011, while on a tour to Maldives, he again started professional photography.

Besides photography, he is the corner stone of Paragon Group, one of the leading business establishments in Bangladesh. He started off with the business of printing press, however, subsequently, he went on to study the know-hows of agriculture and started poultry business. Apart from press and poultry, the business has expanded in poultry and Animal feed, tea, flour mill, fisheries, dairy farm, milk processing, consumer foods, plastics, export quality shoe manufacturing, renewable energy [solar and bio-gas], organic fertilizer etc and health service sector also.

In terms of photography, Moshiur Rahman believes that mere effort is not enough. It is necessary to have a synchronization with the subject. He reminisces of the places he had travelled to, when he was young and didn't have a camera; but the images of moments on those places still alive and seem to be the most beautiful.

Moshiur Rahman's passion and dedication towards photography became evident while in class ten. On a visit to India, he witnessed the dance of a peacock. Amazed at the stunning display of colours and beauty, he had made up his mind that he would capture the beautiful moments in the canvas of photographs for people to show such beauty. Thereafter, he travelled to Taj Mahal and took photographs. Now, he finds pleasure through travelling and makes it more memorable by his passion, photography. His wife accompanies him on his travels and encourages him more in his photographic endeavours.

PHOTOGRAPHY & PASSION

Photography is my passion and this passion stems from the desire to capture a moment in time, share the beauty of the world and the ability to narrate the story of life:

A MOMENT IN MEMORY

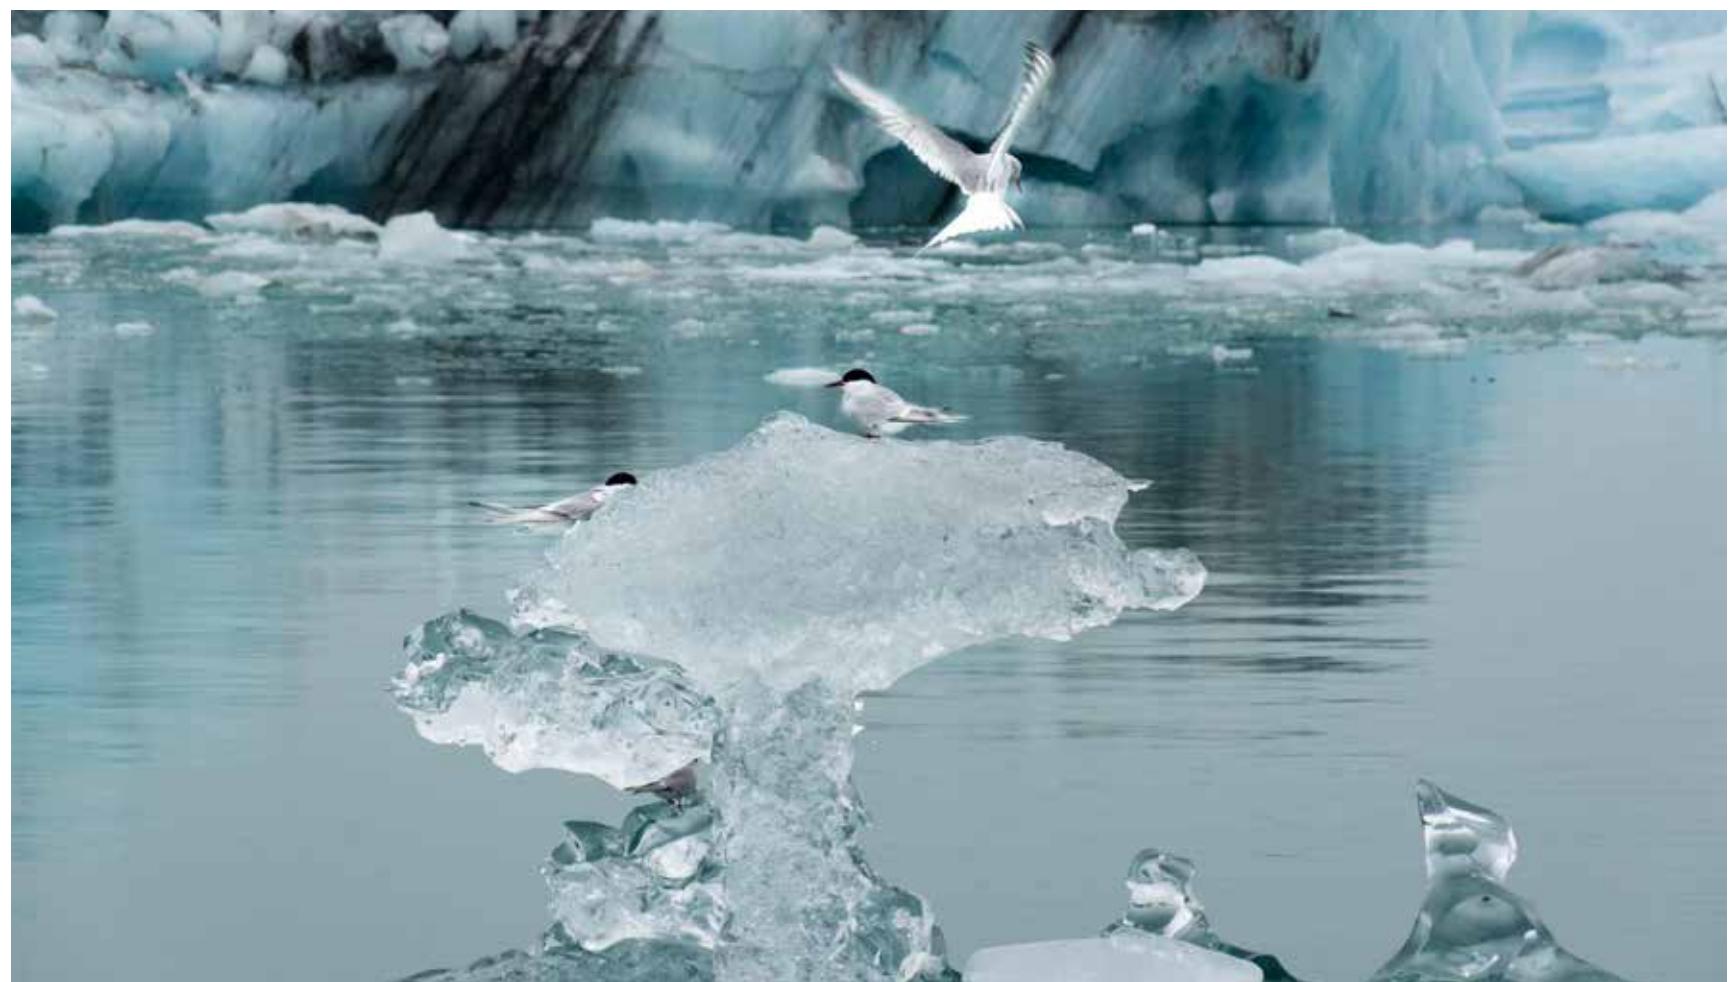

A photograph lets you capture a moment forever. There are many moments that make our life memorable; and photographs etch those memories in the canvas of our life. Photograph lets us relive those moments with fondness and to share those later with all including our near and dear ones.

BEAUTY OF THE WORLD

Beauty lies in the eyes of the beholder. Once you start noticing details, you will inevitably appreciate the beauty of this wonderful world. Nature's beauty can be found through its amazing landscape and wildlife. Beauty is also depicted in the splendour of man-made structures. Thus, a photograph lets you to know and appreciate the wonderful wonders of the world.

NARRATING A STORY

Photography is a wonderful story-telling tool. A photograph tells a story, a story of people, cultures, festivities, places, nature and wildlife; in short, it narrates the story of life and living. The possibilities seem to be endless. Just ask yourself what story you want to tell, and photography will help you in narrating that story.
